Professional Experience

Founder and Full Stack Web Developer

HashLink Corporation | Karachi, Pakistan | Jan 2026 - Present

- Founded a software and digital solutions brand focused on modern websites, web applications, and business-focused digital experiences.
 - Plan and build responsive websites using React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs, and reusable frontend components.
 - Lead end-to-end website planning including brand understanding, user experience flow, visual direction, development structure, and performance optimization.
 - Create premium website concepts for real estate, restaurant, fashion, architecture, coffee, automotive, and business-focused brands.
-

Selected Projects

Aureon Estate — Luxury Real Estate Website

- Designed a premium real estate website concept for luxury property showcases, high-end living experiences, and modern estate branding.
- Planned a cinematic property hero, interactive property cards, featured estate details, lifestyle image gallery, and inquiry-focused contact section.
- Focused on responsive frontend layout, optimized property images, reusable property card components, smooth scrolling, and fast-loading page structure.

Élan Restaurant — High-End Restaurant Website

- Created a fine dining website concept focused on immersive storytelling, elegant food presentation, and premium hospitality branding.
- Designed sections for a full-screen restaurant hero, chef story, signature dishes, interactive menu preview, atmosphere gallery, and reservation CTA.
- Applied mobile-first layout thinking, performance-friendly assets, smooth image transitions, and interactive menu card structure.

Valenza Fashion — Fashion Brand Website

- Built a modern fashion landing page concept focused on elegance, product presentation, editorial design, and brand identity.
- Created a structure for featured collections, product category cards, lookbook sections, seasonal campaigns, newsletter CTA, and shopping flow.
- Focused on reusable fashion cards, clean collection layouts, image optimization, hover interactions, and responsive product presentation.

Axiom Studios — Architecture Studio Website

- Developed a premium architecture website concept built around minimalism, structure, space, and visual storytelling.
- Planned a minimal hero section, studio philosophy, featured architecture projects, process section, project previews, and professional inquiry flow.
- Used grid-based responsive layout principles, clean typography, smooth scroll sections, and image-heavy page optimization strategy.

Noir Beans — Premium Coffee Shop Website

- Created a light-themed coffee shop website concept with a warm, modern, playful, and human brand personality.

- Designed sections for featured drinks, coffee story, popular menu items, customer mood/reviews, visit/order CTA, and animated menu cards.
- Planned an interactive bug-catching discount game with reward state logic and playful micro-interactions for user engagement.

Stratos Automobile — Automotive Brand Website

- Designed a premium automotive website concept for car showcases, luxury garages, motorsport brands, and high-end automotive experiences.
- Planned a cinematic car hero, featured vehicle showcase, performance highlights, interactive car detail cards, motion-based gallery, and booking CTA.
- Focused on optimized media handling, motion-friendly UI structure, vehicle showcase components, performance-conscious animations, and responsive layout.

Education

Karachi University | Bachelor of Software Engineering | 2026 - 2029

- Ongoing degree focused on software engineering fundamentals, web development, systems thinking, and problem solving.

Saylani Mass I.T Training (SMIT) | Full Stack Web Development | 2025 - 2026

- Ongoing training focused on frontend development, backend development, databases, APIs, and MERN stack application development.
